

## Czech HAZMAT Protect Consortium

# CBRN TRAINING COURSES TAILORED ON THE USER REQUEST

### **GENERALLY**

Based on a long term experience of Czech CBRN products manufacturers in a cooperation with the best subjects from state institutions including Czech Armed Forces facilities the consortium Czech Hazmat Protect have been created.

### **FACILITIES FOR TRAINING**

Training is provided in facilities on the best level equipped with all necessary and relevant devices for education (lessons giving), laboratory works and training in the field including training with live agents.

### **EQUIPMENT**

Supported and cooperating with the Czech NBC Team (alliance of Czech CBRN equipment manufacturers) all equipment is available to be trained with. It covers detection, decontamination, all personal protection, first aid, medical care. Products of Czech manufacturers are completed with equipment from the best producers in the world.

### **LECTURERS - PROFESSIONALS**

The consortium has gathered over 40 professionals covering all specialities appearing in the CBRN at all especially: CBRN theory on different levels, Training management, CBRN crisis management, CBRN detection and decontamination, personal protection, reconnaissance, first aid and medical care, laboratory analytical works including works with live agents, etc. Among lecturers are: specialists from R&D institutions, first responders, specialist from different UN missions in Gulf, inspectors of OPCW. Lessons are given in English, interpreting to other languages available.

### **FLEXIBILITY IN A PROGRAMME BUILDING**

Five independent course modules have been formed and a programme can be set considering

- level of educational attainment and skills of trainees in the CBRN
- scope and depth of information requested
- time that can be spent by trainees

**Five independent course modules can be selected:**

1. CW/HAZMAT Accident response basic course
2. Consequence Management Advanced Course
3. Analytical Chemist Advanced Course
4. Medical Specialist Advanced Course
5. Live Agent Training

Any independent course or several follow-up courses can be provided depending on previous education and skills of trainees, or all courses can be used building a sophisticated programme structure.

Example of “full” training with all parts (The trainees group contains chemists and medical care specialists). Course schedule and pictures present the real course provided lately.
